

A BRIGHTER, CLEANER, MORE CONTROLLABLE LIGHTING UPGRADE FOR BISH CREATIVE

SUCCESS STORY OVERVIEW

Bish Industries upgraded its outdated lighting system with new high-performance LED high bays from OEO Energy Solutions.

The project replaced older fixtures with OEO's 200 watt selectable All-In-One LED high bay, giving the facility brighter, cleaner, and more flexible lighting.

With selectable wattage, selectable color temperature, adjustable beam angle, and Bluetooth dimming controls, Bish Creative now has a lighting system that is easier to control and better suited to its operational needs. OEO also provided a turnkey lighting + installation solution, with the project 90% funded through existing utility incentives, making the payback period almost immediate.

THE CHALLENGE

Blind Creative needed to:

- Replace an outdated lighting setup
- Improve visibility throughout the space
- Create a cleaner, brighter environment
- Add more control over lighting performance
- Upgrade to fixtures built for commercial and industrial use

THE SOLUTION

OEO Energy Solutions provided:

- 200W Selectable All-in-One LED High Bays
- Wattage selectable output for flexible performance
- Color selectable lighting to match the space's needs
- Adjustable beam angle for better light distribution
- Bluetooth controls for easy dimming
- A modern LED fixture designed for high-ceiling commercial and industrial spaces

THE RESULTS

- Brighter, better-quality lighting throughout the space
- Improved visibility for daily operations
- A cleaner, more modern look compared to the old setup
- Greater lighting control through Bluetooth dimming
- Flexible fixture settings for wattage, color, and beam angle
- A stronger, more future-ready lighting system for the facility
