

THE BENEFITS OF DIRECT REPLACEMENT LED FOR YOUR MH AND HPS FIXTURES:

The advantages of converting to LED are becoming well known. The benefits to OEO plug and play direct replacement technology can make upgrading to LED a no brainer and provides a quicker payback compared to new fixtures.

LED BENEFITS

Lower operating costs with **50-68%** energy savings

Better, more consistent light with less lumen depreciation

Reduced HVAC costs since LED generates

90% less heat

NO MERCURY OR HAZARDOUS MATERIALS TO DISPOSE OF

OEO EZ LED ADDITIONAL BENEFITS

1-2-3

Ease of installation
just screw in a light bulb.
Nothing to re-wire.

Change an entire facility **IN ONE DAY** rather than a month

The HID ballast acts as a **surge protector** to prolong the LED life.

Instant on/off with no start up time

Able to be used with motion sensors

Upright version available to maintain original design and aesthetics

Prolonged ballast life via 2 methods:

1

EZ LED does not need the ballast ignitor, this is a common ballast failure point.

2

LED operates cooler than HID so less stress on the ballast to extend life.

Simple upgrade
in the future as LED continues to improve efficiency
