

# Utility Bill Audit

**OEO**  
Energy Savings...Simplified.

On average, 80% of organizations are overcharged on utility expenses due to calculation errors and discrepancies billed by the utility providers. OEO works with organizations to remove errors and overcharges within the utility invoices. We will have suppliers provide you a refund on errors and create uncontested reductions in your monthly bill by removing unnecessary charges.

## Common errors:

- ✘ Incorrect Rate Schedule
- ✘ Hidden telecom PICC charges
- ✘ Incorrect tax classifications
- ✘ Telephone cramming charges
- ✘ Charges on unused/old lines
- ✘ Excessive surcharges

## Ways to Reduce Your Utility Expenses

### Reduce your rates

Save money by reducing per-minute telecom, kWh electric, and DTH gas costs. Compare 3rd-party suppliers for competitive rates. 24/7 operations can leverage off-peak/weekend usage for further savings.

### Decrease your consumption

Reduce energy use with LED retrofits, capacitors, and solar. Evaluate ROI before investing. OEO specializes in commercial LED lighting; we offer free lighting plan evaluations.

### Recapture & Remove Overcharges & Errors!

Our utility bill audit recovers refunds for errors and overcharges. Ensure 100% invoice accuracy and boost your bottom line.

At OEO, we strive to build strong client relationships; **our reputation and your satisfaction is our top priority**. Our auditing team has over 60 years of combined experience performing audits within 48 states, Mexico, Canada, and virtually every industry. We do not use software programs to target the low hanging fruit, but instead every utility bill is analyzed by our experienced auditing team.

**AROUND**  
**80%**  
**OF OUR AUDITS**  
**RESULT IN FINDINGS**

## Utility Audit

- Audit of all electric (including 3rd party generation charges), water/sewer, and natural gas bills for errors and overcharges over past 3-4 years
- Full analysis of current and past usage to ensure all tariffs are correct
- Correction of meter errors, demand errors, rate structures, and unnecessary minimum charges
- Analysis of current utility budgetary spending

## Why do you need an audit?

**Companies often overlook auditing utility and telecom bills, assuming accuracy.** This can lead to undetected errors and overcharges, as utility companies hold customers responsible for verification. Our audit identifies these discrepancies, providing potential refunds and direct bottom-line savings.

## Telecom Audit

- Audit of all local, long distance, wireless, data, and internet charges
- Evaluation of the cost effectiveness of line charges, usage charges, and feature packages
- Constant monitoring of current changes occurring in all areas of the telephone industry for opportunities to lower monthly costs, consolidate services, and remove redundant or outdated charges

## How to start?

All we need to start are copies of your utility bills and any associated contracts. Our contingent-based audit has no upfront fees or risk. We present findings for your approval before corrections.
